

YAG Iridectomy Lens

This lens is used for YAG laser iridectomy procedures.

Product Description

Product Code	Description	Qty. per box
MIPL/J2	YAG Iridectomy Lens	1 Pc.

Features

- This lens consists of a modified Goldmann type fundus lens with a 7.50 mm diameter +70 D plano-convex lens bonded to the anterior surface.
- The +70 D button lens helps in condensing the laser energy so that the procedure can be carried out at lower power settings.
- The anodized light metal rim gives a firm grip on the lens.
- Made in glass.
- CE Certified.

Instructions for Use

The instructions for use and surgical technique are supplied in the form of a leaflet with instructions given in diagram form where appropriate . The international symbols used on the packaging are also explained.

Cleaning & Disinfection

For cleaning and disinfection of the lens, kindly refer to the IFU supplied with the lens or contact our customer care.
